# ¿About us?

Jer courier is a logistics services company that stands out for its speed, punctuality, coverage and reliability in all types of deliveries, especially in delivery by counter-delivery with almost 14 years of experience in the Peruvian market. Our main focus is to develop distribution processes that provide our customers with timely and safe deliveries. We stand out for offering the best customer service and for promoting an organizational culture based on consideration for our collaborators, respect for suppliers and preservation of the environment.

Our objective is to be the integral provider of solutions and technologies for distribution and storage, providing our clients with link solutions with the quality and satisfaction they require. Our experience in the market and our integral logistics solutions allow us to add intelligence to the distribution process, ensuring optimal results and allowing our clients to communicate quickly, directly, safely and reliably with theirs.

# ¿What do we do?

**Distribution service:** we offer distribution service for packages, documents and cargo locally and nationally, ensuring timely and reliable deliveries.

**Courier service:** We provide courier and document delivery solutions, with specialized services that include distribution of valued documents, procedures, home verifications and internal personnel.

**Logistics service:** We have comprehensive logistics solutions that include storage, inventory control, and dispatch of merchandise to ensure a constant and reliable flow of products.

# ¿Why choose us?

## 1. PACKAGING

At Jer courier we understand the importance of the presentation and care of our clients' products. We are committed to ensuring that your products are well protected from the moment they are packaged to their final delivery. We have differentiated packaging options, such as transparent and exclusive packaging to adapt to your visibility and security needs.

## 2. STORAGE

Stock control and correct handling of products are essential to ensure deliveries on agreed dates. At Jer Courier we have an updated and online inventory management system that allows us to have a constant and reliable flow of your products. Our team is in charge of the separation, storage, collection, packaging and shipment of the products, as well as managing deliveries and returns efficiently.

## 3. API INTEGRATIONS

We offer API integrations to facilitate your logistics processes and share information in real time. By using our web service technology and Json format, you can integrate your shipment status information directly into your systems or website. This enables automatic updating without the need for manual interaction, optimizing communication and efficiency throughout your business in a secure manner.

Lorem ipsum

## 4. NOTIFICATIONS (SMS))

Our text message (SMS) notification service is highly effective and personalized. We use advanced technology to send mass and intelligent text messages to your customers' mobile numbers, providing them with detailed information about the main characteristics of your shipment.

We also anticipate the visit of our messengers to your home, guaranteeing clear and timely communication.

## 5. SUPPORT

At Jer Courier we care about keeping our customers informed about the status of their products. That is why we offer different types of support, such as personalized advice through our specialists, a mobile application for motorists, delivery people and the possibility of tracking online the tracking and information of your products through our website and intranet. We also provide text message notifications to your customers' mobile numbers, giving them important delivery details and anticipating our couriers visiting their homes.

***"Smart logistics transforms challenges into opportunities, guaranteeing efficient and profitable deliveries."***

# Support type

## ADVICE AND CALL CENTER

Personalized attention through a specialized advisor for monitoring, recoveries, customer service, incident reports and post-sale services focused on permanently attending to the solution of your needs.

## MOBILE APPLICATION

Our mobile App aimed at motorized drivers is linked to the website where they will receive notifications of online routes. In addition, they will be able to send and update reports and important information for your business. You will be able to observe the status of the visits and service by means of a control over the process of visits and/or deliveries of your products.

## WEB TRACKING

It allows any user who enters to make inquiries for the guide number with which the shipment was mobilized. The information displayed there corresponds to the traceability carried out by Jer Courier from the beginning of the reception process,

## INTRANET

Allows you to enter an exclusive portal for corporate clients; You will be able to monitor the characteristics of the tracking and information of your products online, at any time, helping to control shipments at all stages of the logistics process. To access this option it is necessary to have a username and password assigned by our area in charge..
